MEDICAL DEPARTMENT

OF THE

TULANE UNIVERSITY OF LOUISIANA.

(FORMERLY 1847-84, UNIVERSITY OF LOUISIANA.)

CATALOGUE FOR 1895-96.

CIRCULAR FOR 1896-97.

WITH NOTICE OF THE COURSE IN
PHARMACY OF THE MEDICAL DEPARTMENT.

THE CHARITY HOSPITAL OF LOUISIANA,
TULANE AVENUE, BETWEEN HOWARD AND LOCUST STREETS, NEW ORLEANS.
TWO SQUARES FROM THE BUILDING OF THE MEDICAL DEPARTMENT.

AND WITH
ANNOUNCEMENTS
OF THE

Academical Departments of the University.

NEW ORLEANS:
L. Graham & Son, Ltd., Printers, 207-211 Baronne Street.
1896.

THIS CATALOGUE IS PUBLISHED ANNUALLY IN JUNE.

TULANE UNIVERSITY OF LOUISIANA,

(Formerly, 1847-1884, the University of Louisiana.)

PRESIDENT OF UNIVERSITY.

WM. PRESTON JOHNSTON, LL. D.

ADMINISTRATORS.

His Excellency M. J. FOSTER, <i>Governor of Louisiana.</i>	} <i>Ex-officio.</i>	
Hon. J. V. CALHOUN, <i>Superintendent of Education.</i>		
Hon. WALTER C. FLOWER, <i>Mayor of New Orleans.</i>		
Hon. CHAS. E. FENNER, <i>President.</i>		
JAMES MCCONNELL, <i>First Vice President.</i>		
Hon. E. D. WHITE, (<i>Ass. Justice Supreme Court, U. S.</i>) <i>Second Vice President.</i>		
C. J. BICKHAM, M. D.	CHAS. JANVIER.	B. M. PALMER, D. D. LL. D.
CARTWRIGHT EUSTIS.	J. B. LEVERT.	WALKER B. SPENCER.
E. H. FARRAR.	J. C. MORRIS.	WALTER R. STAUFFER.
WALTER C. FLOWER.	ASHTON PHELPS.	R. M. WALMSLEY.
HENRY GINDER.		GEO. Q. WHITNEY.

MEDICAL FACULTY.

STANFORD E. CHAILLÉ, M. D., Dean.
Professor of Physiology, Hygiene and Pathological Anatomy.

ERNEST S. LEWIS, M. D.,
Professor of General and Clinical Obstetrics and Diseases of Women and Children.

JNO. B. ELLIOTT, M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

EDMOND SOUCHON, M. D.,
Professor of Anatomy and Clinical Surgery.

LOUIS F. REYNAUD, M. D.,
Professor of Materia Medica, Therapeutics and Clinical Medicine.

RUDOLPH MATAS, M. D.,
Professor of General and Clinical Surgery.

A. L. METZ, M. PH., M. D.,
Professor of Chemistry and Medical Jurisprudence.

LECTURERS, INSTRUCTORS, DEMONSTRATORS.

LUTHER SEXTON, M. D., Lecturer and Clinical Instructor on Minor Surgery.

EDW. W. JONES, M. D., Lecturer and Clinical Instructor on Diseases of Eye and Ear.

ISADORE DYER, M. D., Lecturer and Clinical Instructor on Dermatology.

H. S. LEWIS, M. D., Lecturer and Clinical Instructor on Physical Diagnosis.

J. B. ELLIOTT, JR., M. D., Lecturer and Clinical Instructor on Physical Diagnosis.

E. D. FENNER, M. D., Lecturer and Clinical Instructor on Diseases of Children.

HENRY BAYON, M. D., Demonstrator of Anatomy.

S. P. DELAUP, M. D., A. J. BLOCH, M. D., M. SOUCHON, M. D., Assistant Demonstrators of Anatomy.

P. E. ARCHINARD, M. D., Demonstrator of Microscopical Anatomy and Bacteriology.

O. L. POTHIER, M. D., Assistant Demonstrator of Microscopical Anatomy and Bacteriology.

WARREN S. BICKHAM, M. D., Demonstrator of Operative Surgery.

H. B. GESSNER, M. D., Assistant Demonstrator of Operative Surgery.

T. A. QUAYLE, M. PH., M. D., Demonstrator in charge of the Pharmaceutical Laboratory.

H. P. JONES, M. D., and OTTO LERCH, M. D., Assistant Demonstrators in the Chemical Laboratory.

MEDICAL DEPARTMENT.

1. This institution, founded in 1834 as the "Medical College of Louisiana," became in 1847 the "Medical Department of the University of Louisiana," and in 1884 the "Medical Department of the Tulane University of Louisiana." It is the oldest medical college in the Southwest, and has the greatest number of alumni and of students. To April, 1896, it had registered the names of 11,624 students, and of these it had conferred diplomas on 3306—namely, on 3037 graduates in medicine and 269 graduates in pharmacy.

2. The next annual course of instruction in this department, now in the sixty-second year of its existence, will begin on Thursday, October, 15, 1896. The commencement will be held on Wednesday, April 14, 1897. There will be only three holidays—Christmas, New Year and Mardi Gras. The first two weeks of the term will be devoted especially to Clinical Medicine, Surgery, Obstetrics and Gynæcology in the wards and amphitheatre of the Charity Hospital, and to practical work in the Laboratories of Practical Anatomy (Dissecting Rooms), of Chemistry, of Pharmacy, and of Histology and Bacteriology. These laboratories will be open for instruction on Monday, October 19, 1896.

Recent Changes.

3. Since the publication of the last catalogue the medical faculty has been deprived of the services of Dr. Jos. Jones, Professor of Chemistry and Medical Jurisprudence. He served the Medical Department faithfully from July 30, 1868, to the date of his death, February 17, 1896.

The vacancy thus caused has been filled by the selection of Dr. A. L. Metz, M. Ph., well known for his long and efficient services as the Instructor in charge of the Pharmaceutical and also of the Chemical Laboratory. He will continue to supervise and to give personal attendance to both laboratories.

Dr. T. A. Quayle, M. Ph., will be the Demonstrator of the Pharmaceutical Laboratory.

Drs. H. P. Jones and Otto Lerch will serve as Assistant Demonstrators in the Chemical Laboratory.

Dr. H. B. Gessner has been chosen Assistant Demonstrator to the Laboratory Operative Surgery.

The antiquated amphitheatre, erected in 1847 in the Charity Hospital, was replaced in 1895 by a model building, seating more than 400 students, and admirably adapted to the exacting needs of modern surgery, as also to the greatly improved instruction of medical students.

A gymnasium within the college grounds was established in 1894 by the faculty for the health and recreation of students.

The Library of the Medical Department will be reorganized and replenished, as a library of reference, to the great advantage of students, alumni and the medical profession.

New Building with Its Laboratories.

4. The Medical Department has, since October, 1893, occupied a new site, twice the size of the former one and only two squares from the Charity Hospital, and thereon a four-story building (three stories above a most excellent basement), which provides ample accommodations for larger classes and for all the needs now requisite to medical education; larger and better lecture and recitation rooms, and, best of all, ample and well-equipped laboratories for Chemistry, for Pharmacy, for Practical Anatomy, for Operative Surgery, for Microscopical Anatomy, Pathology and Bacteriology, and working rooms for Practical Physiology and for gross Pathological Anatomy. These admirable laboratories, now added to the unrivalled practical advantages for clinical, anatomical and pathological studies given by the Charity Hospital, enable the Medical Department to provide its students with unsurpassed advantages for their medical education. For other details of the new building see the last page of this catalogue and pages 3 and 4 of the cover.

Clinical Instruction at the Charity Hospital.

5. The faculty solicits the special attention not only of students, but also of graduates of other colleges, to the unequalled clinical and anatomical advantages of the Medical Department.

It is universally admitted that without abundant anatomical and clinical material no medical school, however numerous or eloquent its professors, can possibly fit its pupils for practical professional life. It is scarcely necessary to state that it is only in large cities that such advantages can be procured, but it is of paramount importance that the opportunities there afforded should be properly utilized; that the students should be required, under the direction of the teacher, to examine patients for themselves, to keep record of cases, to note daily changes which may occur, and thus acquaint themselves by personal observation with the progress and termination of diseases and accidents. The mere introduction of a patient into an amphitheatre, and the discussion of his case by the professor in the presence of a large class, is no substitute for bedside instruction, such as is offered by the great Charity Hospital of New Orleans; and no reduction of lecture fees, not even their entire abolition, can possibly compensate for the lack of such opportunities. The use of the wards of this noble institution, with its *seven hundred beds*, and its annual occupancy thereof by about ten thousand patients, and the use of the two clinical buildings, with more than twenty thousand annual out-door patients, have been given by acts of the Legislature to the professors of the Medical Department of the Tulane University of Louisiana, for the practical instruction of its students, not only in Medicine and Surgery, but also in Obstetrics and Gynæcology. Medical students are given access to the Charity Hospital without payment of any hospital fees, and far better opportunities for the study of diseases therein than are usually enjoyed in the hospitals of other cities. For the study of the diseases of the Southwest, and also of the diseases of the negro race, there is no field comparable to the wards of this hospital. Between the new buildings of the Medical Department and the Charity Hospital there are only two squares, which distance is readily walked in three minutes.

The following table of 9812 cases treated in the wards of the Charity Hospital during the year 1895 will give some idea of the great advantages possessed by the Medical Department for the practical study of Medicine and Surgery:

DISEASES.	Number of Cases.	DISEASES.	Number of Cases.
Fevers and other general diseases.....	2,527	Venereal	692
Nervous system.....	560	Bones and joints.....	191
Circulatory organs.....	278	Toxic diseases.....	63
Respiratory organs.....	947	Eye, ear and nose.....	265
Digestive organs.....	974	Skin.....	129
Genito-Urinary organs.....	610	Local diseases and injuries.....	1,741
Women (253 obstetrical cases).....	619	All other diseases.....	216
		Total	9,812

There were 1423 deaths and 257 births, and a daily average of 705 in-door patients. In addition to the 9812 "in-door" patients there were 21,559 "out-door" patients treated, to whom 80,463 consultations were given. In addition to these there were 2731 "accident" cases attended in the Surgical Amphitheatre. The 21,559 out-door patients furnished for instruction the following valuable material, viz.: Medical cases, 7066; surgical, 4537; nervous, 145; venereal and skin, 2485; gynæcological, 1454; diseases of children, 2213; eye, ear, nose and throat, 1822; dentistry, 1837. It should be noted that the sum total of all cases treated in 1895 in the Charity Hospital was 34,102.

Of the grand total of in-door and out-door patients in the Charity Hospital 11,690 were colored. There are sixteen wards for females. Of the fifty-two

The Gold Medal and Certificate of the First Degree of Merit was awarded THIS HOUSE
for the Best Printing of Historical and Art Works published in Louisiana,
by the World's Cotton Industrial Exposition 1884-85.

wards in the Charity Hospital there are twenty-three medical, fourteen surgical, two obstetrical and two gynecological wards, two for children, four for diseases of the nervous system, two for venereal diseases, two for diseases of eye and ear, and one for skin diseases; and all these wards are accessible to students.

There are besides two admirable two-storied clinical buildings for out-door patients. Each of the buildings is subdivided into eight different services, and seven of these are alike in both buildings, viz: A service for medical cases; for nervous diseases; for surgical cases; for venereal and skin diseases; those of the eye; of the ear, nose and throat; and for cases of dentistry. In addition to these seven services the "Men and Boys' Clinic" has a surgical service for boys, and the "Women and Children's Clinic" has a gynecological service.

It is manifest that these facilities for *genuine* clinical teaching, which recent improvements in the hospital have greatly increased, are now unsurpassed by any medical college in the United States.

6. The professors and clinical instructors are Attending Physicians or Surgeons of the Hospital, and visit their wards daily, accompanied by the students, who are thus brought into immediate contact with the sick and wounded, and are taught practically auscultation and percussion, analysis of urine, the use of the microscope in diagnosis, the application of dressings, etc. Surgical operations are performed and lectures delivered upon selected cases in the amphitheatre of the hospital.

Special clinical instruction is given to the candidates for graduation and to all students, who are for this purpose divided into classes and assigned to the respective professors and clinical instructors, in charge of wards in the hospital. The classes thus formed interchange courses, so that all students enjoy equal advantages. Competent Chiefs of Clinic aid the clinical teachers in developing this system of instruction. The following professors and clinical instructors and their respective chiefs of clinic and assistants will be on duty the ensuing session:

The regular lectures at the hospital, on Clinical Medicine, by Professors Elliott and Reynaud; on Surgery, by Professors Matas and Souchon; and on Obstetrics and Diseases of Women and Children, by Professor Lewis, will be delivered in the amphitheatre, daily, between 8:30 A. M. and 12 M.

Post-mortem examinations are made in the presence of the class by the Professor of Pathological Anatomy.

Diseases of the Eye and Ear are taught in the eye-wards and amphitheatre of the Hospital, and constitute a part of the curriculum of the surgical chair.

Special instruction in diseases of the skin, diseases of children, physical diagnosis and minor surgery is given by the Lecturers on these subjects.

7. The Administrators of the Charity Hospital elect annually, by competitive examination in March, fourteen resident students, who are entitled to board and lodging in the institution free of charge, and fourteen externes, who serve as assistants in the out-door clinics. Four resident students in the Touro Infirmary are also elected annually by competitive examination.

Lectures and Laboratories.

8. *Lectures.*—Systematic didactic instruction will be given daily, immediately after the hospital clinics, in the new building of the Medical Department on Canal street, between Villere and Robertson streets, only two blocks from the hospital. The means for illustrating the didactic lectures consist of numerous models in wax, papier maché, plaster and wood of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the Medical Department; very many tables and diagrams; a complete series of specimens in materia medica; surgical and obstetrical instruments and appliances; a large collection of natural, anatomical and pathological specimens and preparations, and a set of chemical and physical apparatus.

Hygiene and Medical Jurisprudence are now obligatory studies, and the lectures on these subjects are adequately illustrated.

Chemical Laboratory.

9. This laboratory readily accommodates ninety-six students working at the same time, and one course therein is obligatory on all first-course students. It is under the directorship of the Professor of Chemistry, aided by Drs. H. P. Jones and Otto Lerch, Assistant Demonstrators. Special attention is given to medical chemistry and to such knowledge of Chemistry as will prove of greatest service to the practising physician. Every student will be provided with a separate table, apparatus and reagents.

Microscopical Laboratory.

10. This laboratory readily accommodates one hundred students working at the same time, and one course therein is obligatory on all candidates for graduation. Microscopical anatomy, both normal and morbid, and also the elements of bacteriology are taught. This laboratory is in charge of Dr. P. E. Archinard, a pupil of Pasteur and of Koch. Dr. Archinard's assistant is Dr. O. L. Pothier.

Operative Surgery.

11. Is practically taught in the Laboratory of Operative Surgery. The instructors in charge are Dr. Warren S. Bickham, Demonstrator, and Dr. H. B. Gessner, Assistant Demonstrator. The entire field of General Operative Surgery will be gone over, the steps of each operation being first admirably illustrated by means of an Electric Optical Projector, and fully explained by the Demonstrator, after which the students, in sections, will perform the operations in the presence of the Demonstrator and the class.

Requirements for Matriculation.

Every student before being matriculated for the first course of Medical Lectures shall be required to possess the following qualifications:

12. He shall hold a certificate as the pupil of some known reputable Physician, showing his moral character and general fitness to enter upon the study of medicine. (See form No. 1.)*

13. He must possess a diploma of graduation from some literary or scientific institution of learning; or a certificate from some legally constituted High School, General Superintendent of State Education or Superintendent of some County or Parish Board of Public Education, attesting that he has been examined and is pos-

sessed of at least the educational attainments required of second grade teachers of public schools. (See form No. 2.)†

14. A set of tickets showing that the holder has attended one full course of medical lectures in any regular and recognized medical college is essential to matriculating for a second course of lectures; and every student, prior to matriculating for a third course of lectures, shall be required to show by similar evidence that he has previously taken two courses of lectures.

15. The following classes of students may apply for advanced standing and obtain it, provided every applicant undergoes a satisfactory examination upon every branch below the class desired to be entered:

(a) Graduates of Pharmacy, of Dentistry, and of Veterinary Medicine.

(b) Graduates and matriculates of Colleges of Homeopathy and of Eclectic Medicine.

(c) Graduates of recognized Colleges and Universities who have completed therein prescribed courses in elementary branches of medicine, including Chemistry and Biology.

Requirements for Graduation.

16. Every candidate for graduation must be of good moral character, and must have attained the age of twenty-one years.

17. He must have *attended*, in a regular and reputable medical college, three full courses of lectures, of not less than six months (26 weeks), in three separate years. Said six months courses of lectures to be regarded as legitimate, and to be estimated in the requirements for graduation, must not be taken continuously, but there must intervene at least three months between the closing of one course and the opening of the succeeding course.

18. He must have dissected in two courses, and must have attended two courses of clinical or hospital instruction, and one course in each of the following special laboratory departments, viz.:

1. Chemistry. 2. Histology and bacteriology. 3. Operative surgery.

19. He must submit a thesis (composed exclusively by the candidate, and in his own handwriting) to the dean between January 1 and March 1 of his last session;‡ must have paid all college dues, including the graduation fee, and must pass satisfactory examinations before the members of the faculty.

*Form No. 1.189...

Secretary (or Dean) of.....

CityState.....

Dear Sir:

Mr.of.....

is a gentleman of good moral character. I recommend that he be allowed to enter upon his medical studies in your college. He has been my pupil..... months.

Yours,

(Sign here).....

†Form No. 2.189...

Secretary (or Dean) of.....

City

Dear Sir:

I have examined Mr.

of and find his scholastic attainments equal to those requisite for a second grade teacher's certificate in our public schools.

Yours,

.....Supt. Pub. Education.

‡The names of authors of very meritorious theses are publicly mentioned at Commencement. Students about to become candidates for graduation are urged to prepare their theses during the summer vacation.

Examinations After Two Annual Courses.

20. Students who have attended and paid for two full courses, the last of which was in this institution, are permitted to undergo examinations upon one or more of the branches taught by the four chairs of Chemistry, Anatomy, Physiology and Materia Medica. The examinations, if successful, will not be repeated, but if the applicant should fail upon one or more of them he will be granted a second trial, when he shall present himself for final examination.

Attendance on Three or More Annual Courses.

21. Students who have attended and paid for all of the required full courses, the last of which was in this institution, are thereafter entitled to attend the lectures without charge for the professors' fees; and it is the earnest desire of the faculty that they should avail themselves of this privilege to the extent, at least, of one additional course before applying for graduation.

FEES.

22. The fees of this institution now amount to a total of \$465 for a three-years' course.

Considering the exceptional advantages for practical instruction in hospital and in laboratories, and the constant care and labor bestowed upon the pupils, the charges are as low as are compatible with the superior advantages given; and the faculty therefore appeal to their professional brethren throughout the Southwest to continue their support to an institution which does not seek to increase the size of its classes by pecuniary rivalry and *discreditable underbidding*, but by offering a *full equivalent for its charges*.

Table of Fees.

	FIRST YEAR.	SECOND YEAR.	THIRD YEAR.
Matriculation Fee	\$5 00	\$5 00	\$5 00
Professors and Lecturers	120 00	120 00	120 00
Demonstrator of Anatomy	10 00	10 00	
Chemical Laboratory	15 00		
Microscopical Laboratory		15 00	
Operative Surgery			10 00
Diploma or Graduation Fee.....			30 00
Total	\$150 00	\$150 00	\$165 00

All fees are payable in advance, that is, on admission.

23. *Matriculation Fee.*—Every person, whether student or graduate, admitted to the privileges of this College, must pay a matriculation or registration fee of \$5 for every session he may attend; and will not be entitled to admission to either College or Hospital until registered.

24. *Breakage Fees.*—A breakage fee of \$5 must be deposited for every course in the Chemical, in the Pharmaceutical and in the Microscopical Laboratory to reimburse needless injuries inflicted on the laboratories and their contents. At the end of every session the breakage fee will be refunded in whole or in part, depending on the charges incurred by the student.

25. Graduates of this College and all medical students, who have paid all fees in the Table of Fees, will not be charged the professors' fees, but will be charged the matriculation fee and the fees for all laboratory courses they may voluntarily attend.

26. Students who do not attend full courses, but only *partial or special* courses, must pay for the tickets of the professors whom they may attend, \$20 each; and for other fees as in the Table of Fees.

27. Graduates of other recognized medical colleges must pay the matriculation fee, \$5, and for the professors' fees, \$70, and thereafter will be entitled to the

same privileges given to the graduates of this College. They can not, however, obtain its diploma without passing the final examinations, and without paying the graduation fee.

Instruction in Pharmacy.

The University is also authorized by law to grant diplomas in Pharmacy, and the Medical Department has exercised this privilege since 1838, having now 269 graduates, and 30 to 40 students in Pharmacy annually.

28. The students of Pharmacy are required to attend two annual courses of lectures given by the professors on Chemistry and Medical Jurisprudence, on *Materia Medica* and Therapeutics, and on Hygiene, and to attend one course in the Chemical and two courses in the Pharmaceutical Laboratory.

Instruction in the Pharmaceutical Laboratory is graded, and consists of a junior and of a senior course. These courses are designed to fit the student to conduct the processes of manufacturing and of dispensing in the most thorough and economical manner.

29. Reputable women are admitted as students to the full course in Pharmacy, on the same terms and conditions required of male students.

30. Pharmacy students are subjected to the educational "requirements for matriculation" enforced on medical students (see pars. 12, 13), and all candidates for graduation in Pharmacy must comply with the requirements specified in paragraphs 16, 19 and 28, and must also submit to the Dean a satisfactory certificate of at least two years' practical experience under the instruction of a competent pharmacist.

31. *Fees.*—The charge for the first full course in Pharmacy is \$75, viz: for matriculation \$5, professor's fees \$35, chemical laboratory \$15, and pharmaceutical \$20; and for the second course \$80, excluding the chemical laboratory fee, \$15, and including the graduation fee, \$20. In addition every student must deposit a breakage fee of \$5 for the Chemical and \$5 for the Pharmaceutical Laboratory, in accordance with paragraph 25.

32. Students in Medicine who take also the course in Pharmacy are required to pay only the laboratory fees. Students in Pharmacy are not charged for the tickets of professors after attendance upon two full courses; but all students are charged for every laboratory course, however numerous these may be.

33. The Chemical and Pharmaceutical Laboratories will be opened for instruction on Monday, October 19, 1896.

Text-Books.

34. The books mentioned below are recommended in preference to others; but *recent editions of any standard works* may be used in their stead. Only one text-book on each branch is indispensable. The cost of a set of text-books on all the branches is about \$50. The prices affixed below are now the lowest prices of the cheapest copies, usually in cloth:

DICTIONARIES—Dunglison, \$6.00; Gould, \$2.75; National, \$12.

PHYSICS—Avery, \$1.00; Gage, \$1.25; Ganot, \$4.50.

CHEMISTRY—Simons, \$3.00; Witthaus' Manual, \$3.75; Pellew, \$2.50; Blaxam, \$3.00.

MEDICAL JURISPRUDENCE—Reese, \$3.00; Taylor (Bell Edition), \$4.50.

CHEMICAL LABORATORY—Pellew, \$2.50; Simon, \$3.00.

PHARMACEUTICAL LABORATORY—Remington's Practice of Pharmacy, \$5.50; United States Pharmacopœia, \$2.50; Caspair, \$4.00; Coblentz, \$3.50.

MICROSCOPICAL LABORATORY—Histology—Prudden, \$1.25; Klein, \$1.60; Piersol, \$3.25. Bacteriology—Abbott, \$2.25; Sternberg, \$8.00.

ANATOMY—Gray, \$4.80; Morris, \$6.00; Holden, \$2.70; Souchon's Resumé, \$2.50.

PATHOLOGICAL ANATOMY—Green, \$2.50; Coats, \$5.00; Zeigler, \$5.00; Payne, \$3.00; Delafield & Prudden, \$5.00

PHYSIOLOGY—Waller, \$4.00; Stewart, \$3.60; Yeo, \$2.50; Foster, \$4; Landois, \$6.00.

HYGIENE—Wilson, \$3; Notter, \$—; Rohe, \$3.00.

MATERIA MEDICA AND THERAPEUTICS—Bartholow, \$4.00; Wood, \$5.50; Hare, \$3.50; National Dispensatory, \$5.75; Maisch, \$3.

PRACTICE—Flint, \$4.25; Loomis, \$5.00; Osler, \$5.50; Pepper \$10.00.

PHYSICAL DIAGNOSIS—Page, \$2.00.

DERMATOLOGY—Ransom, \$1.00; Crocker, \$4.50; Morris, \$3.25.

SURGERY—American Text-book, \$7.00. Operative Surgery—Treves' Manual, \$8.00. Minor Surgery—Wharton, \$2.70. Asepsis and Antiseptics—Beck, \$1.35. Surgical Pathology—Tillman, \$5.00; Warren, \$6.00; Senn, \$4.50. Venereal Diseases—Taylor \$5.50. General Reference Dennis' System of Surgery, \$24.00.

DISEASES OF THE EYE—Nettleship, \$1.80; Noyes, \$6.00.

DISEASES OF THE EAR—Politzer, \$5.00; Hartman, \$—.

DISEASES OF THE EAR, NOSE AND THROAT—Seiler, \$2.00; Sajous, \$4.00; Burnett, \$12.

OBSTETRICS—Playfair, \$3.60; Lusk, \$4.50; American Text-book, \$7.00; Winckel, \$3.00.

GYNÆCOLOGY—Garigues, \$4.00; Skene, \$6.00; American Text-book, \$7.00; Keating & Coe, \$6.00.

DISEASES OF CHILDREN—Smith, \$4.00; American Text-book, \$7.00; Orthopedic Surgery, Bradford & Lovett, \$5.40.

Students Preparing to Enter College.

35. Are recommended to study especially Avery's or Gage's Physics; Simon's Chemistry; Gray's Anatomy; Waller's or Stewart's Physiology, or any other standard works on these four subjects.

The study of physics is specially urged on all intending to enter a medical college.

Expenses, Etc.

36. Information about houses for boarding and lodging may be obtained by application to Oswald C. Belfield, Janitor. The price usually paid by students is \$20 per month.

For any additional information, address "PROF. CHAILLÉ, DEAN, P. O. Drawer, 261," Letters thus *officially* addressed secure prompt attention even if the Dean be absent.

STANFORD E. CHAILLÉ, M. D.,

Dean of the Medical Department.

NEW ORLEANS, LA., *June, 1896.*

GRADUATES OF 1896.

At the Sixty-second Annual Commencement, held Wednesday, April 15, 1896, the Annual Address was delivered by the Right Rev. Davis Sessums, and the Valedictory by Dr. Eugene H. Walet, of Louisiana.

Degrees were conferred on seventy-seven graduates, viz.: sixty-eight in medicine and nine in pharmacy, as follows:

One medical student, MR. J. E. CAPDAU, also took the course in pharmacy making a total of 44 pharmacy students.

TULANE UNIVERSITY OF LOUISIANA.

SESSION 1896-97.

Tulane University of Louisiana embraces University Courses, College of Arts and Sciences, College of Technology, H. Sophie Newcomb Memorial College for Young Women, Law and Medical Departments.

The literary and scientific branches of the University are now located in the new buildings on St. Charles avenue, opposite Audubon Park.

The College of Arts and Sciences offers Classical, Literary and Scientific courses, leading to the degree of Bachelor of Arts or Bachelor of Science.

The College of Technology has four courses, viz.: Mechanical Engineering (including Electrical Engineering), Chemical Engineering, Civil Engineering, Architectural Engineering.

The University is well equipped with Libraries, Museums, extensive Laboratories, Work Shops, and Scientific Apparatus.

Tuition, \$105 a session, with small laboratory fees.

The University grants about 175 scholarships in its Academic Departments.

H. SOPHIE NEWCOMB MEMORIAL COLLEGE.

"The H. Sophie Newcomb Memorial College in the Tulane University of Louisiana, for the higher education of white girls and young women," has been established as a department of Tulane University through the munificence of Mrs. Josephine Louise Newcomb, of New York City.

Special courses are offered to those who find it desirable or necessary to restrict their work to one or more branches.

There is an Academic Department which prepares students for the College.

The charge for tuition in the College is \$100, and the Academy \$80.

Provision has been made for the accommodation of boarding students in the building erected for the purpose, and known as the Josephine Louise House, opposite to the College.

Through the increased liberality of Mrs. Newcomb a College Chapel and an Art Building have been erected upon the Newcomb grounds.

LAW DEPARTMENT.

The *Law Department* was organized in 1847. Under a series of distinguished professors it has been in successful operation ever since.

The Degree of Bachelor of Laws, granted by the University, entitles the person on whom it is conferred to admission to the bar of this State. The Faculty aim to prepare the students for admission to the bar, not only in this State, but also in any of the common law States of the Union. The charge for lectures and instruction is \$80. The annual session begins in November and closes in May. Judge Henry C. Miller, Associate Justice Supreme Court of Louisiana, is Dean.

For general catalogue address

WM. O. ROGERS,
SECRETARY TULANE UNIVERSITY.

WM. PRESTON JOHNSTON, LL. D., President.

DESCRIPTION OF THE NEW BUILDING,

WITH DIAGRAMS OF FIRST, SECOND AND THIRD FLOORS.

The general plan consists of a central building to provide two large lecture rooms, one above the other; and of two wings chiefly for laboratories, but also for library, museum, offices, recitation and private rooms.

The disposition of the building for special purposes, and the seating capacity of lecture rooms and laboratories are indicated in the diagrams.

An unusually well lighted, well floored, dry and commodious basement (beneath the first floor and not presented in the diagrams) provides ample storage rooms, and also excellent rooms for the greater comfort of students, such as a study room, smoking room, etc.

The lecture rooms, laboratories, and all rooms except those in the basement, are free from all posts and pillars; and the two lecture rooms are abundantly lighted and ventilated, and each has a seating capacity of about 500.

The Microscopical Laboratory is believed to surpass in size, in lighting and in ventilation any in the United States.

The Students' Chemical Laboratory has the same size and superiorities.

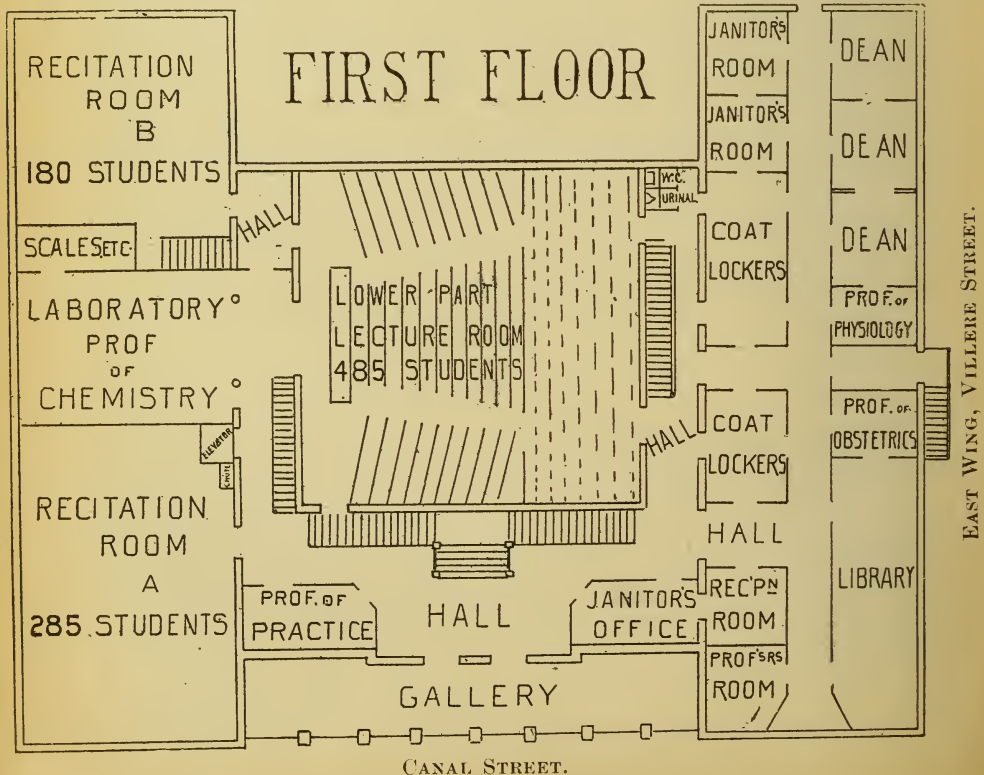

The Dissecting Rooms are believed to be unsurpassed in all essentials and can accommodate 200 students at work at the same time.

Lavatories and urinals are conveniently located on every floor.

The building supplies several private rooms for special work of students or graduates.

The college lot measures about $256\frac{1}{2}$ feet front on Canal, $199\frac{1}{4}$ feet on Villere street, $313\frac{1}{4}$ feet on Robertson street, and $102\frac{1}{4}$ feet on Customhouse street; containing, therefore, about 62,764 square feet, while the building occupies only 16,528 square feet; thus leaving ample space for ornamental and recreation grounds at present, and for extension in the future.
